— MANUFACTURES AND SERVICING OF —

The Ultimate Solutions to All Water Problems

## About Us:

We at MJM always look for new ways to provide ideal solutions to its customers through both technological and business innovation in the area of water and waste water Management. We are giving solutions and maintaining relationships with all our customers share knowledge in the process to make independent and capable to manage efficient water Management.

### *We would like to introduce our self as a manufacturer of*

- Sewage Treatment plant (STP).
- ISI drinking water treatment plants
- R.O. Plant (Domestic & commercial)
- D.M. Plant ,
- Water Treatment Plant (WTP)
- Softener Plant ,
- Iron Removal Plant,
- Biological media filter,
- Water testing & Consultancy,
- ISI Lab Equipments,
- Chemistry & microbiology training.

We provide complete customized solutions for all your water related problems by implementing the latest technological advancements ,This is backed by a highly experienced and professional engineering and a efficient service team.

Our company created with replicating global success stories in India through the use of the latest technology and selecting the right solutions to meet unique local needs

### *We gives the areas of*

- ◆ Residence
- ◆ Hospitals
- ◆ Swimming Pools
- ◆ Commercial Flats
- ◆ Apartments
- ◆ Bungalows
- ◆ Industries
- ◆ Hotels & Restaurants
- ◆ Schools & College.

BOD Incubator

BOD Shaker

Hot Air Oven

Bacteriology Incubator

Fume Hot Cupboard

AutoClave

Distillation Water Unit

PH Meter

TDS Meter

Turbidity Meter

UV Sterlizer

Water Bath

Colony Counter

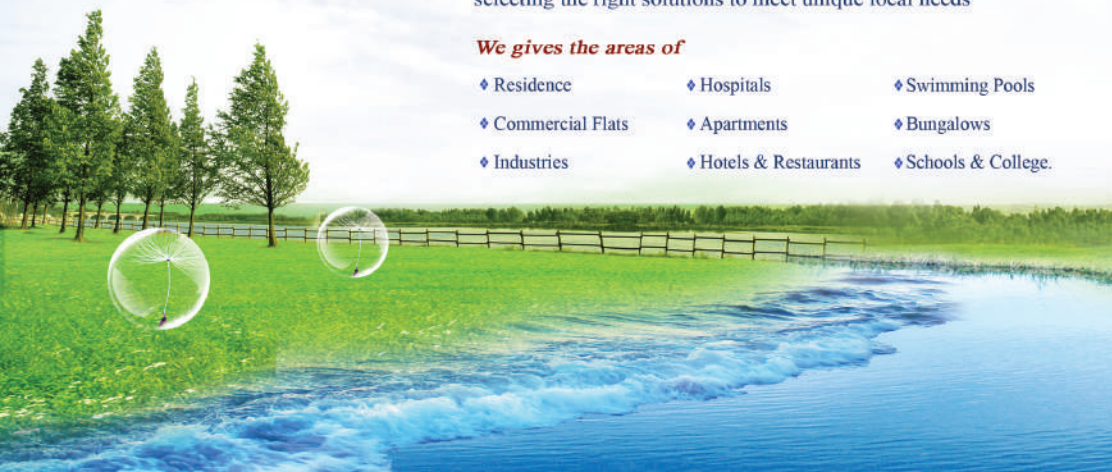

Conductivity Meter

Photo Colori Meter

Chemicals & Galss Wares

**Demineralization Plant:**

MJM provides high quality demineralization plants to the clients.

**Uses :**

- Reduces Total Dissolved solids (TDS)
- Reduces Silica

**Application:**

- Treating Boiler Feed Water
- Production of Water for industrial use
- Production of water for Power Plant Generators

**Ultra Filtration :**

MJM Provides the right type of Ultra- Filtration set up.

**Uses :**

- Removal of Protein
- Oil and water Separation
- Organics removal
- Colloidal Iron removal
- Color and TOC Reduction
- Colloidal Silica Removal

**Application :**

- Pre-treatment for RO systems
- Surface Water Application

**Biological media filter**

MJM provides high quality of biological media filter to the clients.

**Uses:**

- Removal of bacterios
- Removal of Biological Growth
- Removal of silica.

**Application:**

- Pre-treatment for RO systems
- Production of Water for industrial use
- Surface Water Application

**Sewage Treatment Plant:**

MJM uses state of art design and advanced technology to erect very efficient STP. The Process that remove the majority of the contaminates from waste - water or sewage and produce both Liquid Effluent suitable for disposal to the natural environment and sludge.

**Methods:**

- Activated Sledge Process.
- Fludo Benzo Bio Reactor.

**Application:**

- Treating Canteen Waste
- Treating Both Waste
- Treating Toilet Waste

**Uses :**

- Removes the Color & Order
- Removes other harmful matter
- Helps Maintain water to effluent discharge Standards
- Helps treat water to use it for recycling

**Pouch Machine:**

MJM Gives Customers Specifications follows Pouch Filling machine MS & Stainless Steel Model With All Accessories.

**Uses:**

- Mineral Water Pouch Packing
- Softdrinks Pouch Package
- Oil Pouch Package.

**Hydro pneumatic systems:**

A domestic industrial water supply in which water is pumped the supply system into a pressure tank for storage.air in the tank is compressed by the water entering the tank.as the pressur in the tank increases ,the pressure in the water distribution system also increase,since it is fed from the tank.

**Uses:**

- Commercial offices and industries
- Clubs & Sports complex
- Residential Requirement
- Restaurants & hotels
- Food joints & Resorts
- Water Treatment Plants

# Our Products

Membrane Housings

All Type of Membranes

Swimming Pool Vessals

FRB Vessals

All Type of Pumps

Flow Meters

Micron Filters

Dosing Pumps

FRB Housings

UV

Ozonator

SS Tanks

# Our Projects

## Reverse Osmosis (RO)/Mineral Water Plant :

With its highly efficient RO plants MJM provides water from potable water quality to semi conductor range water quality.

### Application:

- Treating effluent water
- Treating brackish water
- Treating Sea water
- Treating Generator feed water
- Treating Tap water
- Production of Drinking water

### Uses :

- Removes total dissolved solids (TDS)
- Removes Chemicals in water
- Removes Bacteria and Viruses
- Outlet water is pure, clean, safe, odor free refreshing and healthy
- Removes hardness & organic
- Enhances taste

### Softener Plant:

MJM Provide the ion exchange process in the softener plants .

### Uses:

- Reduces hardness in water

### Application:

- Production of water fit for domestic purposes
- Production of water fit for industrial purposes eg. Cooling Towers

### Iron Removal Treatment :

MJM Provide the Iron Removal Systems Proper Way of testing & right solution.

### Uses:

- Reduces Iron & Odor

### Application:

- Production of water fit for domestic purposes
- Production of water fit for industrial purposes.
